*We excel in performing full
overhaul for:*

- CF6-80C2
- CFM56-3
- CFM56-5B
- CFM56-7B

Services

An all-around maintenance capability to ensure that your engine is up and running seamlessly:

- Overhaul Service
- On-Wing & Off-site
- Engine Tear Down Parts
- Consignment Programs
- Engine Parts Disassembly
- Engine Exchange

About Us

Our Legacy

The fact that Jordan Airmotive was one of the few engine MRO facilities in the region it has acquired approvals from most authorities in the MENA region extending its services to a wide range of operators in that region.

In the year 2000 and part of the Jordanian government to privatize the Royal Jordanian airline, the former engine shop was part of this privatization which made Jordan Airmotive come into being as brand name in the MRO aviation sector.

The Facility started to grow dramatically and success was the roadmap for the company that drew a lot of private investors' attention which was won by a private Jordanian investor "Current Chairman" in 2006.

Jordan Airmotive now is one of the leaders as a MRO facility in the region as it continues the success story until this day.

About Us

Our Legacy

Established in 2000 as an engine shop for Royal Jordanian Airlines, Jordan Airmotive came into existence as a brand with the privatization process, to be the property of a private Jordanian investor, our current chairman, in 2006.

Taking the highway of success ever since, Jordan Airmotive has seen a dramatic growth in capabilities and status, acquiring the approvals of most aviation authorities in the region.

Today, Jordan Airmotive stands out as a leading MRO facility with operation coverage worldwide.

Competitive Edge

We carry on our operations and services with the mindset of “time, quality, and cost matter” to ensure you get superior-quality service, at a reasonable cost and on a timely manner. We grant the manifestation of this philosophy in:

A detailed close-up photograph of a jet engine's turbine section, showing the complex, curved blades of the compressor and turbine. The image is in black and white, with a blue border. The turbine is the central focus, with its blades radiating outwards from a central hub. The lighting highlights the metallic texture and the precision engineering of the components.

Crafty, Skilled, and Licensed Hands

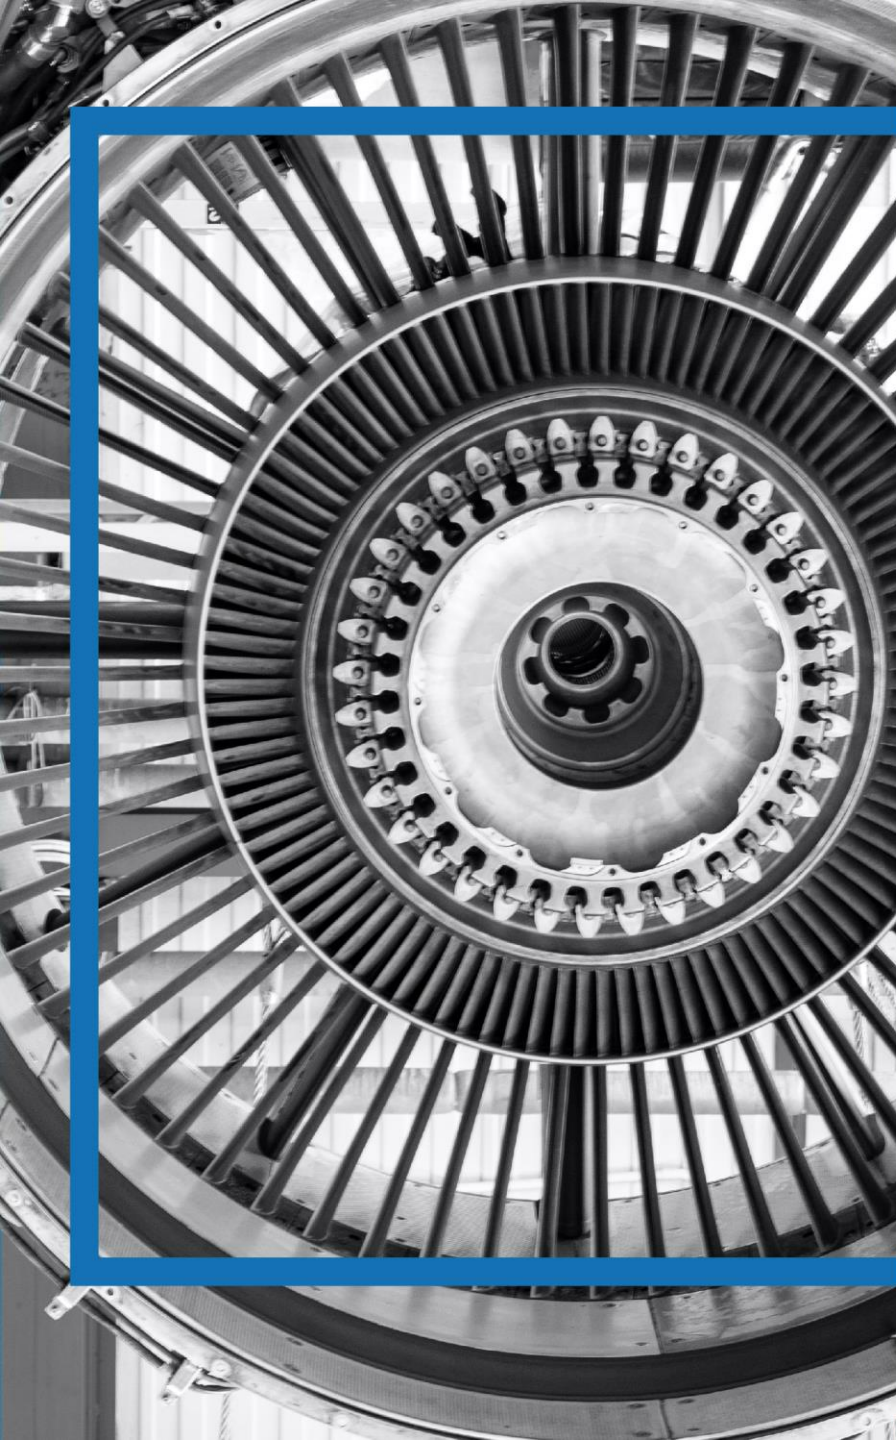

Armed with the most recent knowledge, our team puts together highly skilled and licensed technicians capable of completing the most complex maintenance tasks efficiently while meeting crucial deadlines.

After Sales Services

Even beyond our doors, we always stand for our work with the after-sale services that include on-the-site support and engine troubleshooting.

Available and Reachable, All the Time

Through multiple agreements with major vendors, we ensure the availability and timely-delivery of the required spare parts for any maintenance operation we carry on.

No More One-Solution-Fits-All

we meet your various requirements through various service contract-terms, including Time & Material, Not-to-Exceed Price, Firm-Fixed Price and others.

The Support You Need, When You Need It

We provide you with the support you need through our around-the-clock customer service and support.

A close-up, low-angle shot of a jet engine's fan section, showing the numerous curved blades radiating from a central hub. The image is partially obscured by a blue overlay containing text.

The Extra Mile We Go

1. Tax Exempt:

Saving you the extra cost paid for taxes since we are located in a Tax-Free zone.

2. Experience VS Cost:

Although neck-and-neck in terms of experience, our man-power costs less compared to the surrounding MRO facilities in the region.

3. Off-Site Support:

Saving you the shipping and shop-visit costs.

4. Customized Work Space:

Depending on highly-customized work spaces to meet various maintenance requirements to save you time.

5. PMA & DER Solutions:

Encouraging the repair VS replacement policy, keeping the replacement as the last choice so you don't have to incur its costs.

Strategic Location & Global Reach

Our operations and services coverage expands beyond the boundaries of the MENA region:

- North America
- Canada
- Central Asia
- Far East
- Middle East
- GCC
- Europe
- East Europe
- Russia
- CIS
- Australia
- Africa

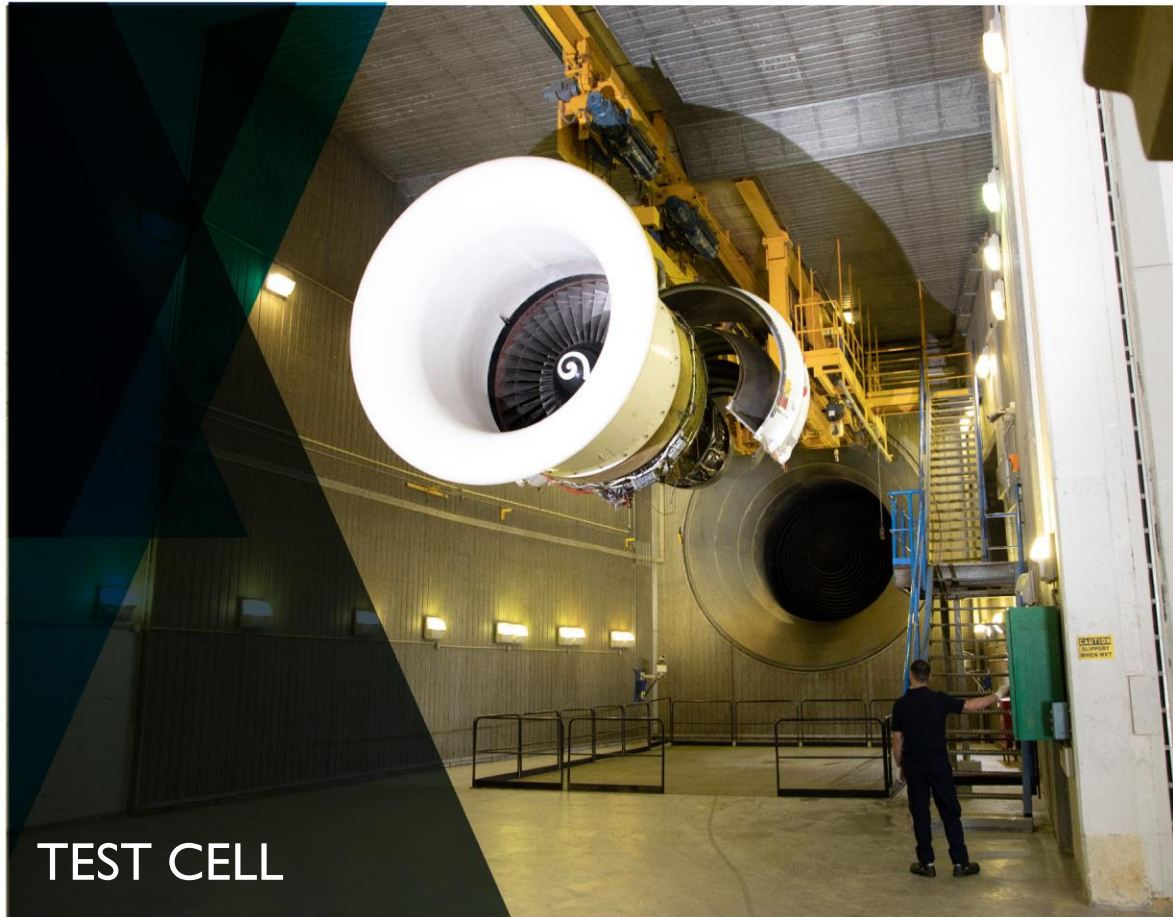

Facilities

Spanning over 27,000 sqm of land, our facilities stand tall as a representation of the international standards of aviation industry operated by top-in-the-field licensed technicians. Our facilities feature high-tech, modern, state-of-the-art machineries that guarantee high-quality results.
